SUMMARY

Final-year B.Tech Computer Science student with a strong academic record and hands-on experience in full-stack development and AI integration, gained through internships and team-based projects requiring cross-functional coordination, clear communication, and ownership of end-to-end delivery.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL

Web: React.js, Next.js, Node.js, Express.js, TypeScript, REST APIs

AI/LLMs: LangChain, Prompt Engineering, GPT, Claude, Gemini, Hugging Face

Databases & Tools: MongoDB, MySQL, Git, GitHub, Docker, AWS

EDUCATION

VIT Bhopal University

2023 – 2027

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.11

Jawahar Navodaya Vidyalaya, Ghaziabad

2018 – 2022

XII CBSE: 83.6%, X CBSE: 90.17%

PROJECTS

TaskPulse – AI-Powered Career Roadmap Platform

Jan 2025 – Present

Full Stack Web Application – Live Demo

React, Node.js, Express.js, MongoDB, LangChain, Gemini AI

- Engineered an AI-powered career roadmap platform using React, Node.js, and MongoDB, scaling to 50+ active users with personalized 4-year roadmaps broken into semester-wise and week-wise milestones.
- Architected end-to-end LLM workflows by integrating Gemini AI through LangChain with RESTful backend APIs, automating onboarding and roadmap generation.
- Implemented JWT-based authentication and a modular React (Vite), Express, and MongoDB architecture, deployed on Vercel and MongoDB Atlas.

Nestly Room Rental Platform

Apr 2024 – Nov 2024

Full Stack Web Application – Live Demo

EJS, JavaScript, Node.js, MongoDB

- Led a 6-member team to design and deliver a full-stack room rental platform end-to-end within 8 months, using EJS, Node.js, and REST APIs across 5+ property listings for 20+ users.
- Configured secure authentication and session management using Passport.js and Express Sessions, safeguarding user data platform-wide.

EXPERIENCE

Full-Stack AI Engineer Intern

Jan 2026 – May 2026

<https://opener-ai.com/> Opener Technologies Private Limited

Remote

- Led a developer while coordinating with UI/UX, Product, and QA teams, reporting directly to the Founder and owning end-to-end delivery and issue resolution while delivering weekly progress updates to 5+ stakeholders.
- Modernized 5+ deprecated APIs with Apify and RapidAPI-based solutions, strengthening platform automation and uptime.
- Refined 10+ Gen AI prompts and designed the welcome modal UI, improving resume-parsing accuracy while structuring user/job data in Supabase SQL via 20+ queries.
- Rebuilt Google OAuth 2.0 and Gmail API integration for secure recruiter communication and diagnosed and resolved 10+ critical bugs through large-scale testing with 100+ users.

HACKATHONS & OPEN SOURCE

- Deloitte Hacksplasion 2026: Collaborated within a 5-member team to build an AI agent pipeline automating IT/service-desk ticket triage, cutting manual categorization effort by 80% and reaching the Final Round.
- Epsilon TeXpedition Hackathon 2026: Advanced to the Semifinal Round by building and demonstrating a working application. [Demo]
- Hacktoberfest 2024: Submitted 5+ pull requests including Node.js bug fixes, CSS improvements, MongoDB database corrections, and Java enhancements across multiple repositories.

CERTIFICATIONS & ACHIEVEMENTS

- Google IT Support Professional Certificate – Google Career Certificates (Jan 2026)
- Full-Stack Web Development (MERN) & Data Structures and Algorithms (Java) – Apna College (Jan 2023 – Dec 2025)
- NPTEL Elite (Top 5%) – Introduction to Machine Learning – IIT Madras (2025)
- NPTEL Elite Gold (Top 5%) – Marketing Analytics – IIT Kharagpur – Score: 97/100 (2026)
